# Zoo

Design: Paul Brooks

A collection of ZOO visitor chairs is a perfect combination of design and solid construction. Frame powder-lacquer colors and plastic elements can be combined with each other according to individual needs.

You can also opt for the simpler ones and a more harmonious solutions choosing plastic connected with metal frame in the same color. The monocolour combination stands out with discreet elegance and new lightgrey and grey will bring you modern look to the equipped conference room, canteen or common space office.

Elegance in a simple form.

In Zoo chair we took care of every detail. All nuts, bolts and more connecting elements remain invisible.

However, a contoured seat and backrest ensures comfort. Zoo also has its invaluable advantage: you can easily stack them and quickly organize the space.

Give a minimalist design style space. Choose the perfect configuration: 4-legged frame or cantilever, with plastic or upholstered seat, plastic or upholstered backrest, with or without armrests, in multicolour or in a beautiful modern monocolour: lightgrey or grey!
